Allowable Subject Matter

Claims 1, 2, 4, 5, 7, 8, 10, 11, 12, 14, 15, 16, 17, and 18 are allowed.

The following is an examiner's statement of reasons for allowance:

In regards to independent claim 1, the prior art found does not specifically teach " providing one or more interfaces for creating global annotations for an instance of one of the identified data elements instantiated by a first application in a first document, wherein a first one of the interfaces for creating global annotations is accessible from the first application, and wherein the interface is configured to capture both annotation content supplied when a global annotation is created for the instance of the identified data element and a context of the instance of the identified data element, wherein the context identifies how the first data element is used within the first document; and providing one or more interfaces for viewing, from each of the plurality of applications, the global annotations, wherein a first one of the interfaces for viewing the global annotations is accessible from a second application capable of instantiating the first data element in a second document using a representation of the data element different than the representation of the first data element in the first document, and wherein the global annotation created for the first data element, when viewed, presents the annotation content and the context identifying how the first data element is used in the first document;" in combination with all the other claim limitations.

In regards to independent claim 12, the prior art found does not specifically teach, "providing a first interface allowing a user to create a global annotation for a selected one of the identified data elements, wherein the first interface is configured to

capture both annotation content supplied when a global annotation is created for the instance of the selected data element and a context of the instance of the selected data element, wherein the context identifies how the selected data element is used within the first set of data; providing a second interface allowing the user to view the global annotation from within a second application loading a second set of data containing the selected data element for which the global annotation was created, and wherein the global annotation created for the selected data element, when viewed, presents the annotation content and the context identifying how the selected data element is used in the first set of data; and storing the global annotation created via the first interface in an annotation store, wherein the global annotation is anchored to the selected data element;" in combination with all of the other claim limitations.

All dependent claims are allowable by virtue of their dependence on allowable independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
